

Amendments to the Claims:

Please amend the claims as indicated in the marked-up version of the listing of claims presented below. This listing of claims replaces all prior versions and listings of claims in the present application.

Listing of Claims

1. (Currently amended) ~~An integrally formed one-piece~~ A frame for an apparatus that supplies a pressurized fluid, the frame comprising:
 - a base that supports a power unit;
 - at least one leg that supports the base on a surface; ~~and~~
 - a handle ~~that is~~ configured to be used to move the frame from a first location to a second location, the handle including
 - an upper end;
 - a first support member extending downwardly from the upper end, the first support member forming an acute included angle (C) with the base; and
 - a second support member extending downwardly from the upper end, the second support member forming an acute included angle (D) with the base;
 - wherein the first and second support members are integrally molded as one piece with the base.
2. (Cancelled).

3. (Original) The frame of claim 1, wherein the base includes at least one integral reinforcing rib.

4. (Currently amended) The frame of claim 1, ~~wherein the apparatus includes a power unit having an engine, and~~ wherein the base includes an aperture therein configured to receive for receiving a portion of the a power unit.

5. (Cancelled).

6. (Currently amended) The frame of claim 4, wherein the base includes a mounting plate configured to support the power unit.

7. (Original) The frame of claim 1, wherein the at least one leg includes a plurality of legs.

8. (Currently amended) The frame of ~~claim 1~~ claim 7, wherein ~~the at least one leg~~ each of the plurality of legs includes a support that engages the surface, wherein the plurality of supports and that defines define a footprint of ~~the frame~~ having a first width, and wherein the ~~handle has an upper end of the handle that defines~~ has a second width ~~such that the width of the upper end is less than the first width of the~~ footprint.

9. (Currently amended) The frame of claim 1, wherein the handle further includes an integral accessory holder integrally molded ~~formed~~ as one piece with the ~~frame~~ base.

10. (Original) The frame of claim 9, wherein the accessory holder includes at least one aperture sized to accept a pressure washer wand.

11. (Original) The frame of claim 9, wherein the accessory holder includes at least one aperture sized to accept a pressure washer gun.

12. (Original) The frame of claim 1, wherein the handle includes a plurality of integral grip ridges.

13. (Cancelled).

14. (Currently amended) The frame of ~~claim 13~~ claim 1, wherein the at least one leg includes a first leg and a second leg, wherein the first support member is substantially parallel to the at least one first leg, and wherein the second support member is substantially parallel to the second leg.

15. (Currently amended) The frame of ~~claim 13~~ claim 1, wherein the at least one leg includes a first leg and a second leg, wherein the first support member is contiguous with the at least one first leg, and wherein the second support member is contiguous with the second leg.

16. (Currently amended) The frame of claim 1, wherein each of the handle includes a pair of downwardly extending support members that form forms an acute included angle (H) with the base ~~in the YZ plane~~.

17. (Currently amended) The frame of claim 1, wherein the at least one leg includes a first leg and a second leg, wherein the first leg forms an obtuse included angle (A) with the base, and wherein the second leg forms an obtuse included angle (B) with the base in the XY plane.

18. (Currently amended) The frame of claim 1, wherein the at least one leg includes a first leg and a second leg, wherein each of the first and second legs forms an obtuse included angle (G) with the base in the YZ plane.

Claims 19 and 20 (Cancelled).

21. (Currently amended) The frame of ~~claim 20~~ claim 1, further comprising an ~~integrally formed~~ a front panel integrally molded as one piece with the base.

Claims 22-35 (Cancelled).

36. (Currently amended) The frame of ~~claim 35~~ claim 1, wherein the at least one leg includes first, second, third, and fourth legs, and wherein the frame further includes further comprising a first side panel extending between the first and fourth ~~base support members~~ legs, and a second side panel extending between the second and third ~~base support members~~ legs.

Claims 37-42 (Cancelled).

43. (New) The frame of claim 1, wherein the first support member has a first longitudinal axis and the second support member has a second longitudinal axis, wherein the first longitudinal axis forms an acute exterior angle (E) with respect to the upper end of the handle, and wherein the second longitudinal axis forms an acute exterior angle (F) with respect to the upper end of the handle.

44. (New) The frame of claim 1, wherein the upper end of the handle is integrally molded as one piece with the support members.

45. (New) The frame of claim 1, further comprising a caster coupled to the at least one leg.

46. (New) A frame for an apparatus that supplies a pressurized fluid, the frame comprising:

- a base that supports a power unit;
- at least one leg that supports the base on a surface;
- a handle configured to be used to move the frame from a first location to a second location, the handle including
 - an upper end; and
 - a pair of support members extending from the base, each support member having a first end near the base and a second end near the upper end of the handle;

wherein a first width between the respective first ends of the support members is greater than a second width between the respective second ends of the support members.

47. (New) The frame of claim 46, wherein the pair of support members are integrally molded as one piece with the base.

48. (New) The frame of claim 47, wherein the upper end of the handle is integrally molded as one piece with the support members.

49. (New) The frame of claim 46, wherein the at least one leg includes a plurality of legs each having a support that engages the surface, wherein the plurality of supports define a footprint having a third width, and wherein the third width is greater than the second width.

50. (New) The frame of claim 49, wherein the third width is greater than the first width.

51. (New) The frame of claim 46, further comprising a caster coupled to the at least one leg.
